

Major Business

Construct data solution and
Supply IT infra product based on the
optimum architecture

1 Data Solution

Data modeling & analysis system construction
Data integration & usage consulting
Supply & consult process mining solution

2 Cloud Solution

Cloud strategy consulting
Supply IT infra product
(Cisco, NetApp, VMware, Accordion, etc.)

3 Service

Cloud based web security service : WebBric
IT information platform : Puzzle TV

Why Puzzle Systems?

Business innovation that starts from Data and Cloud

Puzzle Systems designs client's business value based on informatization technology and experience.

Puzzle Systems is engaged in cloud infra business (Server, Storage, Cloud construction and consulting) and data business (DW, BI, big data, Process Mining, etc.) Data analysis / IT infra experts with more than ten years of experience on average provide solutions optimized for clients' business models.

Puzzle Systems.

Company name	Puzzle Systems Inc.
CEO	Kim Young Ill
Main Business	Applied software development and supply
Business Category	A. Data Solution (DW, BI, Big Data, Process Mining)
	B. Cloud Solution (Cisco, NetApp, VMware, Accordion)
	C. Service (WebBric, IT information contents platform)
Address	6F Montvert Building, 438, Bongeunsa-ro, Gangnam-gu, Seoul, Republic of Korea

Vision.

Supporting
Business Growth
through
Data & Cloud

Related numbers.

- 10** **Average employee history**
Specialized consultant group understanding technology and business
- 03** **Business sector**
Cloud and data solution based on optimized architecture
- 10** **Number of allied companies**
Consider popularity & trend Allied with from Cisco to Accordion
- 61** **Number of allied solutions**
Has solutions for server, storage, virtualization, security, process mining
- 22** **Clients**
LG Display, Samsung Electro-mechanics, Donghaeng Lottery, DB Hitek, Kolon, etc.

Business area.

01
Data
consulting

Business strength

Expands the advantage of verified information system architecture

Flexibly integrates traditional BI/DW and big data world

Elementary technology, accumulated experience, cooperation network that can satisfy clients' informatization requirements

02

Cloud consulting

Business strength

One-stop consulting that considers clients' needs

From data center construction to data protection and governance issue solution

Realizes customized architecture by collaborating with Cisco, NetApp, VMware, Accordion

03

Service development

Business strength

High understanding in cloud, security

Retains service marketing channel and capabilities

Steady investment in R&D

Realizes business model from global perspective

Allied solutions.

01 Data alliance solution

DW/BI/Big Data

Strategic collaboration with domestic big data companies

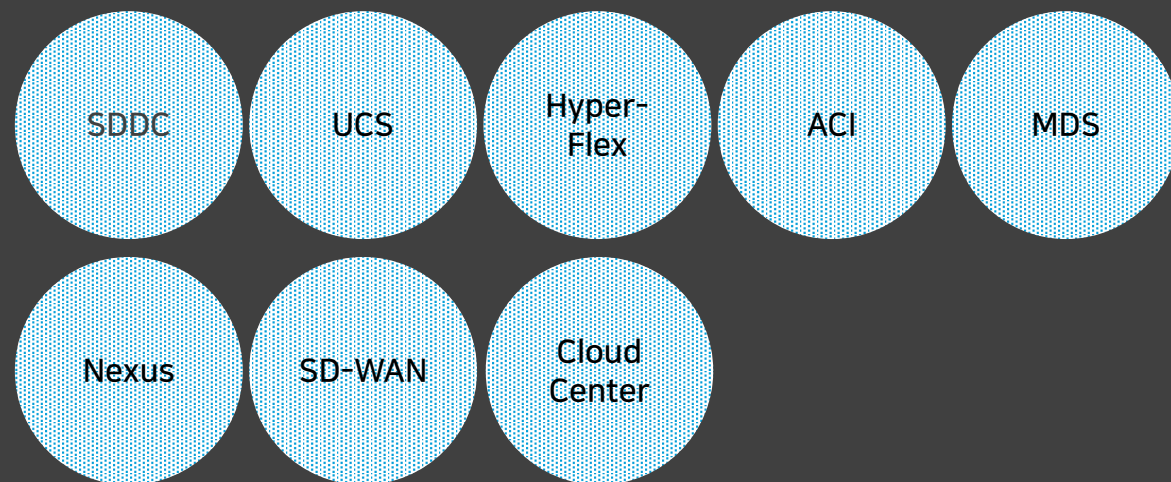

Process Mining

The developer of the first, only process mining solution "ProDiscovery" in Korea

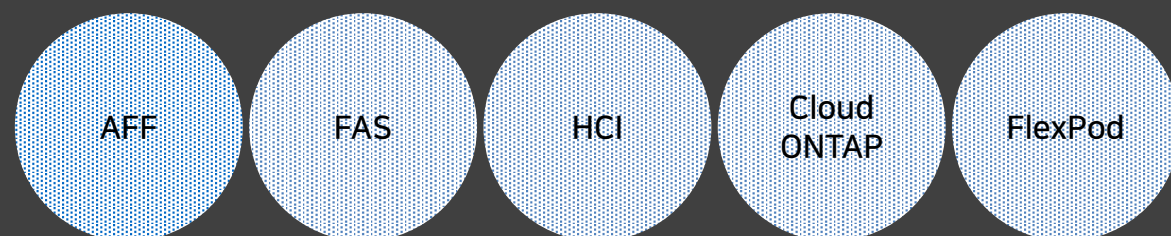

02 Cloud alliance solution

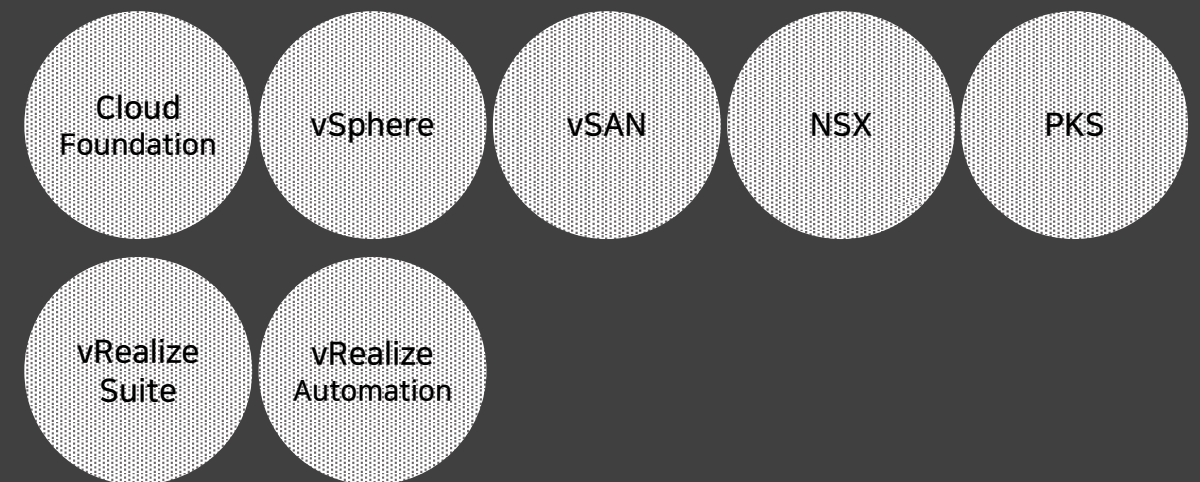

Cisco | Supports solution optimized for clients' business

NetApp | To improve IT efficiency and business agility

VMware | Business innovation by virtualization

Mantech | Kubernetes based web container platform

Consulting process.

Clients' needs + Market trend
+ One-Stop Consulting

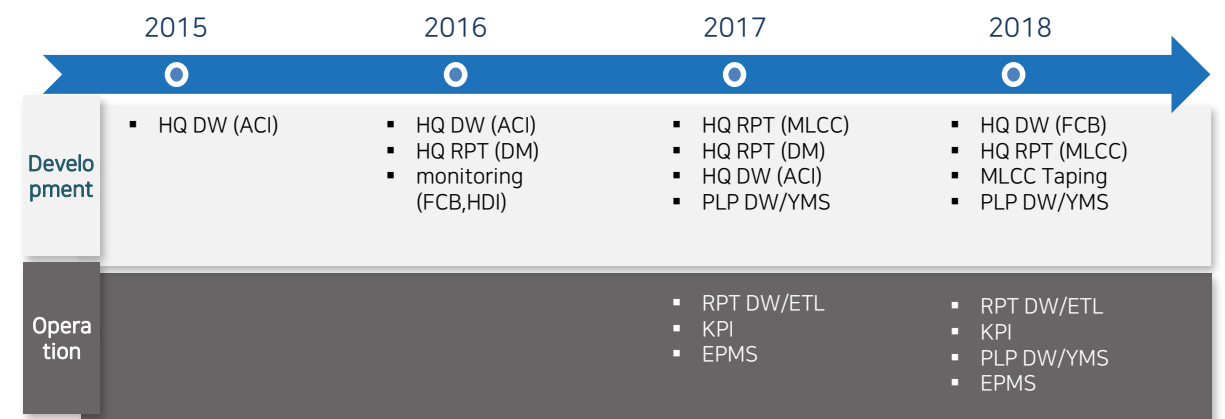

Client cases.

Data solution

Case "S" : Construction & Operation of DW and major information system

Exemplary case that accompanies clients' growth and evaluation for a long-term. Successfully performs various transition scenarios for each operation division/product/station of DW, the core of information system, and of major information systems Cloud solution

Cloud solution

Designs optimized architecture by analyzing client status
 One-Stop process from design, construction to consulting, maintenance

- Case "D" : Veritas NBUA & IBM TS4300 construction project
- Case "S" : High-fusibility cloud energy data center realization project
- Case "D" : Supply NSA FAS8200 storage to development room

Operation service.

WebBric Protect a your web site

WebBric provides **safe web service environment** protected from DDoS, data damage, malicious bots

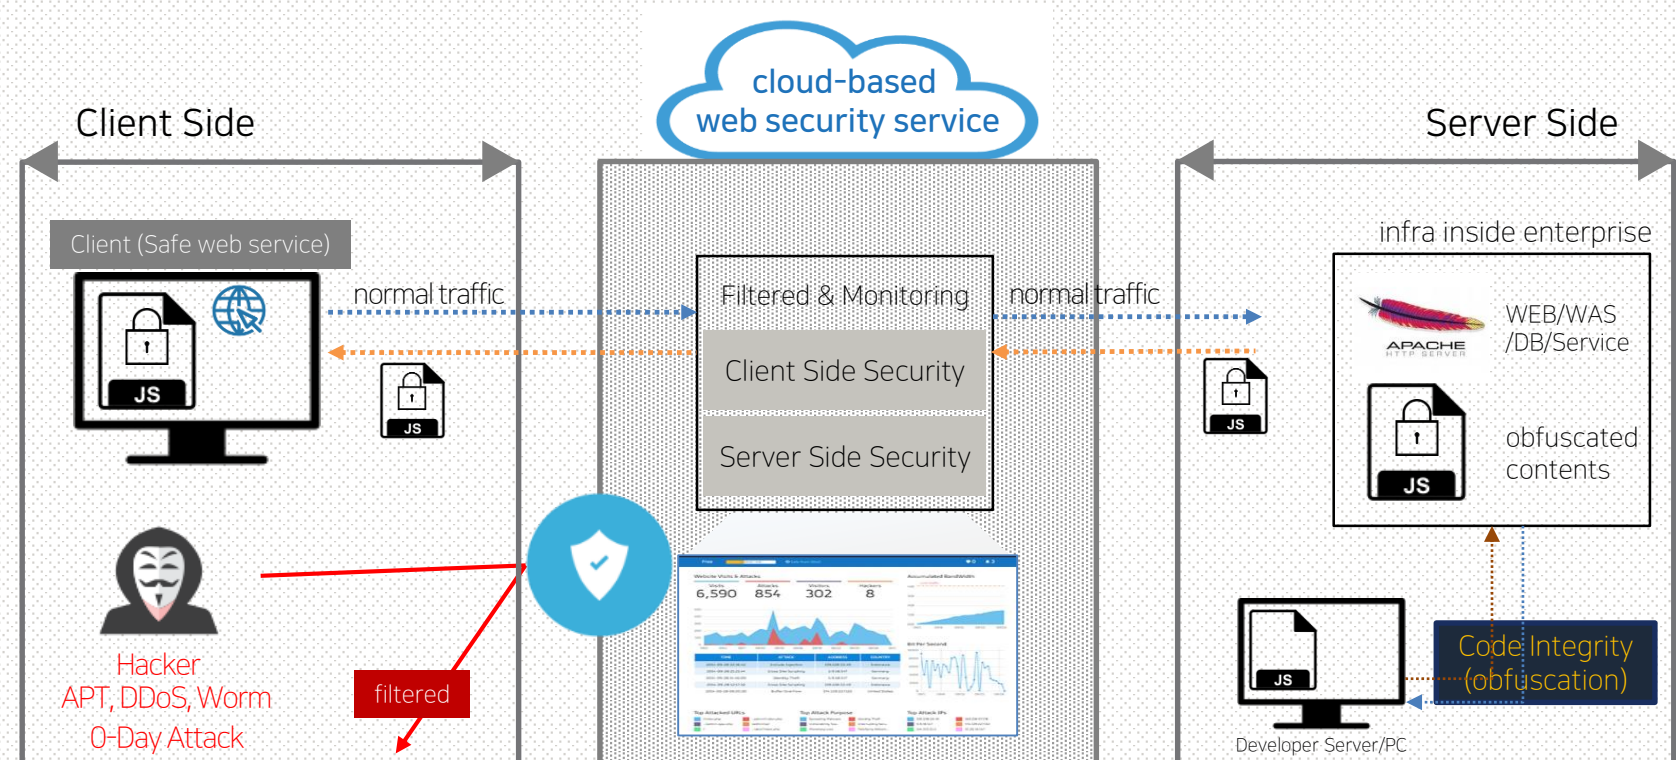

Convenient service usage method

- 1st. Visit WebBric service website
- 2nd. Sign in as a web service member
- 3rd. Enters enterprise and site information
- 4th. Protects offenses 99% or more
- 5th. Reviews report, and makes payment according to the traffic

Atypical offense protection service by automation

Provides cloud service so all traffics go through security prior to connection (cloudification of web firewall)

Provides service just by cloud connection without transferring or changing internal system

Enterprise value.

Accurately analyze and respond to the market change, and **constructs optimized architecture** with accumulated technology power

① Architecture competitiveness	② Development know-hows	③ Commercialization capabilities
High understanding in market and industry	Supplies systems and solutions for large corporates	Allied with major companies in each category
Has many planners with experience of 10 years or more	Develops and operates web security service systems	Operates organizations specialized in alliance and technical sales
Retains unique Key Solution of the company	Provides platform infra optimized for clients	BM planning & operates human resources specialized in R&D
Architecture using solutions , products of allied companies	Developed systems for about 20 domestic enterprises	Retains know-hows in operation and C/S area

We put the puzzle together for the client's business

Data Warehouse

Data and analysis are essential parts in maintaining the business competitiveness of enterprises. Puzzle Systems is providing service for data modeling and construction of analysis system to first class enterprises for years.

Process Mining

Process mining solution 'ProDiscovery' is the only domestic process mining solution that can be used in various fields like customer management, medical treatment, distribution, service, etc. If concerned with business environment getting complicated day by day, we suggest solutions by using 'ProDiscovery'

Cloud Strategy

Puzzle Systems, possessing multiple cloud experts and consulting experiences in various cloud construction, proposes overall directions from consulting to maintenance in architecture, performance, security, fusibility, etc. in which clients are concerned when implementing cloud service.

Cloud Implementation

Cloud is an area with various SW and HW such as server, virtualization, storage, network, etc. integrated. Puzzle Systems provides various cloud engineers, diverse SW, HW essential for cloud service, and construction service all in One-Stop way.

Thank you.
